

PHILIPPINE STUFFS

STUFFS FOR FILIPINOS IN THE PHILIPPINES

Intra**ceuticals** in Manila - The Spa

Intraceuticals**** is an Australian owned and Australian made company that offer advanced facial treatments. Their products and services have been brought to the Philippines by their exclusive Philippines partner, O2 Infusion.

I was invited for a complimentary consultation and **Intra**ceuticals**** facial at The Spa Acropolis.. At around P6,000 per treatment, it's not exactly cheap, but this isn't your average feel

good, pampering facial. O2 infusion provide an advanced facial that will give instant results.

While I found the facial comfortable and definitely effective, It's more suited for someone with a few more years behind them and a few more lines on their face. If you have some wrinkles or fine lines that you want to get rid of quickly, **Intra**ceuticals**** from o2 Infusions is for you.

Due to the advanced technology and skin care products that **Intra**ceuticals**** have developed, you'll see results immediately after your first treatment. Although the results are immediate, they're cumulative, so prolonged use will provide greater results. They recommend a course of six treatments and then a monthly treatment to maintain.

Intraceuticals**** treatments are based on 3 steps. The first is to apply oxygen under light pressure which helps **Intra**ceuticals****' age defying products reach the deeper layers of the skin.

Next is to apply a unique rejuvenating serum which contains hyaluronic acid and a mix of vitamins and antioxidants. This will instantly hydrate the skin, resulting in reduced fine lines, wrinkles and increased facial skin firmness.

Finally, to maintain and keep your skin in good health, **Intra**ceuticals**** provide a range of support products which provide essential skin nutrients and create essential layers to seal in everything your skin needs.
